

API SPECIFICATIONS

1. LOAN PROPOSER DETAILS PAGE

- **ENDPOINT:**

/api/submitLoanProposerDetails

- **METHOD:**

POST

- **REQUEST BODY:**

```
{
  "Loan_Proposer": {
    "Name": "<Full Name>",
    "Relation_Type": "<Relation Type (e.g., S/O, W/O)>",
    "Relation_Name": "<Relation Name>",
    "Address": {
      "Street_Name": "<Street Name>",
      "City_Name": "<City Name>",
      "Mandal_Name": "<Mandal Name>",
      "District_Name": "<District Name>",
      "Pin_Code": "<Pin Code>"
    },
    "Residence": {
      "Type": "<Residence Type (e.g., Flat Number, House Name)>",
      "Door_No_Flat_No": "<Door Number/Flat Number>",
      "Flat_Name": "<Flat Name>" // Only if Residence.Type is "Flat Number"
    }
  }
}
```

- **FIELD DESCRIPTIONS:**

- Loan_Proposer_Name: (string, required) - Full name of the loan proposer.
- Loan_Proposer_Relation_Type: (string, required) - Relationship type (e.g., S/O, D/O, W/O).
- Loan_Proposer_Relation_Name: (string, required) - Name of the person related to the loan proposer.
- Loan_Proposer_Street_Name: (string, required) - Street name of the loan proposer's residence.
- Loan_Proposer_City_Name: (string, required) - City name of the loan proposer's residence.
- Loan_Proposer_Mandal_Name: (string, required) - Mandal name of the loan proposer's residence.
- Loan_Proposer_District_Name: (string, required) - District name of the loan proposer's residence.
- Loan_Proposer_Pin_Code: (string, required) - PIN code of the loan proposer's residence.
- Loan_Proposer_Residence_Type: (string, required) - Type of residence, either "Flat Number" or "House Name".
- Loan_Proposer_Door/No_Flat_No: (string, required) - Door or flat number of the residence.
- Loan_Proposer_Flat_Name: (string, optional) - Name of the flat; required only if Residence_Type is "Flat Number".

- **DATABASE STORAGE EXAMPLE:**

```
{
  "_id": "lp12345",
  "Loan_Proposer": {
    "Name": "John Doe",
    "Relation_Type": "S/O",
    "Relation_Name": "Richard Doe",
    "Address": {
      "Street_Name": "T.Nagar",
      "City_Name": "Rcpm",
      "Mandal_Name": "Rcpm",
```

```
        "District_Name": "East Godavari",
        "Pin_Code": "533255"
    },
    "Residence": {
        "Type": "Flat Number",
        "Door_No_Flat_No": "123A",
        "Flat_Name": "Sunset Apartments"
    }
},
"created_at": "2024-08-27T12:00:00Z",
"updated_at": "2024-08-27T12:00:00Z"
}
```

2. IF LOAN PROPOSER AND TITLE HOLDER ARE SAME

- **ENDPOINT:**
/api/updateTitleHolderInfo
- **METHOD:**
POST
- **REQUEST BODY:**

```
{
  "document_id": "lp12345",
  "is_title_holder_same": true

  // true if the loan proposer is the same as the title holder else false
}
```
- **FIELD DESCRIPTIONS:**
 - document_id: (string, required) - Unique identifier of the existing document in the database (e.g., loan proposer ID).
 - is_title_holder_same: (boolean, required) - Indicates whether the loan proposer and title holder are the same (true) or different (false).
- **DATABASE STORAGE EXAMPLE:**

```
{
  "_id": "lp12345",
  "Loan_Proposer": {
    "Name": "John Doe",
    "Relation_Type": "S/O",
    "Relation_Name": "Richard Doe",
    "Address": {
      "Street_Name": "T.Nagar",
      "City_Name": "Rcpm",
      "Mandal_Name": "Rcpm",
      "District_Name": "East Godavari",
      "Pin_Code": "533255"
    },
    "Residence": {
      "Type": "Flat Number",
```

```
        "Door_No_Flat_No": "123A",
        "Flat_Name": "Sunset Apartments"
    }
},
    "is_title_holder_same": true,
    "created_at": "2024-08-27T12:00:00Z",
    "updated_at": "2024-08-27T12:00:00Z"
}
```

3. IF LOAN PROPOSER AND TITLE HOLDER ARE NOT SAME (TITLE HOLDER PAGE)

- **ENDPOINT:**
/api/updateTitleHolderDetails
- **METHOD:**
POST
- **REQUEST BODY:**

```
{
  "document_id": "lp12345",
  "is_title_holder_same": false,
  "Title_Holder_Proposer": {
    "Name": "<Full Name>",
    "Relation_Type": "<Relation Type (e.g., S/O, W/O)>",
    "Relation_Name": "<Relation Name>",
    "Address": {
      "Street_Name": "<Street Name>",
      "City_Name": "<City Name>",
      "Mandal_Name": "<Mandal Name>",
      "District_Name": "<District Name>",
      "Pin_Code": "<Pin Code>"
    },
    "Residence": {
      "Type": "<Residence Type (e.g., Flat Number, House Name)>",
      "Door_No_Flat_No": "<Door Number/Flat Number>",
      "Flat_Name": "<Flat Name>" // Only if Residence.Type is "Flat Number"
    }
  }
}
```
- **FIELD DESCRIPTIONS:**
 - **document_id:** (string, required) - Unique identifier for the document being updated.
 - **is_title_holder_same:** (boolean, required) - This field indicates that the Title Holder is not the same as the Loan Proposer and is set to false.
 - **Title_Holder:** This object contains all the details of the Title Holder, like how the Loan Proposer details were structured.
 - **Name:** (string, required) - Full name of the Title Holder.
 - **Relation_Type:** (string, required) - Relationship type (e.g., S/O, W/O).
 - **Relation_Name:** (string, required) - Name of the person related to the Title Holder.
 - **Address:** Contains address details, including:
 - **Street_Name:** (string, required) - Street name of the Title Holder's residence.
 - **City_Name:** (string, required) - City name of the Title Holder's residence.
 - **Mandal_Name:** (string, required) - Mandal name of the Title Holder's residence.
 - **District_Name:** (string, required) - District name of the Title Holder's residence.
 - **Pin_Code:** (string, required) - PIN code of the Title Holder's residence.
 - **Residence:** Contains details about the residence:
 - **Type:** (string, required) - Type of residence, either "Flat Number" or "House Name".
 - **Door_No_Flat_No:** (string, required) - Door or flat number of the residence.
 - **Flat_Name:** (string, optional) - Name of the flat; required only if Residence_Type is "Flat Number".

• **DATABSE STORAGE EXAMPLE:**

}
```

4. MOST RECENT DOCUMENT DETAILS PAGE

- **ENDPOINT:**
/api/submitDocumentDetails
- **METHOD:**
POST
- **REQUEST BODY:**

```
{
  "document_id": "lp12345",
  "Most_Recent_Document": {
    "Type_of_Deed": "<Type of Deed>",
    "Date_of_Deed_Registration": "<Date of Deed Registration (YYYY-MM-DD)>",
    "Document_Number_of_Deed": "<Document Number of Deed>",
    "Deed_Registered_SRO": "<SRO Name>",
    "SRO_Location": "<SRO Location>",
    "SRO_Mandal": "<SRO Mandal>",
    "SRO_District": "<SRO District>",
    "SRO_Local_Authority": "<SRO Local Authority>"
  }
}
```

- **FIELD DESCRIPTIONS:**
 - document_id: (string, required) - The unique identifier of the document being updated.
 - Most_Recent_Document: This object contains all the relevant details of the most recent deed/document.
 - Type_of_Deed: (string, required) - The type of the deed (e.g., Sale Deed, Gift Deed).
 - Date_of_Deed_Registration: (date, required) - The date when the deed was registered.
 - Document_Number_of_Deed: (string, required) - The official document number assigned to the deed.
 - Deed_Registered_SRO: (string, required) - The Sub-Registrar Office (SRO) where the deed was registered.
 - SRO_Location: (string, required) - The specific location of the SRO.
 - SRO_Mandal: (string, required) - The mandal where the SRO is located.
 - SRO_District: (string, required) - The district where the SRO is located.
 - SRO_Local_Authority: (string, required) - The local authority under which the SRO operates.

      "Extent": "<44 Feet>",
      "Owner": "<RVGSR>"
    }
  }
}
```

- **FIELD DESCRIPTIONS:**

- document_id: (string, required) - The unique identifier of the document being updated.
- Property_Boundaries: This object contains all the details of the property boundaries.
- East_Boundary: This object holds the details of the east boundary.
 - Type: (string, required) - The type of the east boundary (e.g., House, Site).
 - Extent: (string, required) - The extent of the east boundary (e.g., 44 Feet).
 - Owner: (string, required) - The owner of the east boundary.

- West_Boundary: This object holds the details of the west boundary.
 - Type: (string, required) - The type of the west boundary (e.g., House, Site).
 - Extent: (string, required) - The extent of the west boundary (e.g., 44 Feet).
 - Owner: (string, required) - The owner of the west boundary.
- North_Boundary: This object holds the details of the north boundary.
 - Type: (string, required) - The type of the north boundary (e.g., House, Site).
 - Extent: (string, required) - The extent of the north boundary (e.g., 44 Feet).
 - Owner: (string, required) - The owner of the north boundary.
- South_Boundary: This object holds the details of the south boundary.
 - Type: (string, required) - The type of the south boundary (e.g., House, Site).
 - Extent: (string, required) - The extent of the south boundary (e.g., 44 Feet).
 - Owner: (string, required) - The owner of the south boundary.

```

• **FIELD DESCRIPTIONS:**

- **Document_Type:** String — Type of the document (e.g., "Sale Deed", "Encumbrance Certificate").
- Fields specific to the document type:
 - For **Sale Deed:**
 - Seller: String — The name of the seller.
 - Buyer: String — The name of the buyer.
 - Date: String (Date in "DD/MM/YYYY" format) — The date of the document.
 - Document_No: String — The document number.
 - Original/Photo_Copy: String — The type of the submitted document ("Original" or "Photocopy").
 - Issuing_Authority: String — The authority that issued the document.
 - For **Gift Deed:**
 - Donor: String — The name of the donor.
 - Donee: String — The name of the donee.
 - Date: String (Date in "DD/MM/YYYY" format) — The date of the document.
 - Document_No: String — The document number.
 - Original/Photo_Copy: String — The type of the submitted document ("Original" or "Photocopy").
 - Issuing_Authority: String — The authority that issued the document.
 - For **Partition Deed:**
 - Partitioner: String — The name of the Partitioner.
 - Recipient: String — The name of the Recipient.
 - Date: String (Date in "DD/MM/YYYY" format) — The date of the document.
 - Document_No: String — The document number.
 - Original/Photo_Copy: String — The type of the submitted document ("Original" or "Photocopy").
 - Issuing_Authority: String — The authority that issued the document.
 - For **Mortgage Deed:**
 - Mortgagor: String — The name of the mortgagor.
 - Mortgagee: String — The name of the mortgagee.
 - Date: String (Date in "DD/MM/YYYY" format) — The date of the document.
 - Document_No: String — The document number.

- Original/Photo_Copy: String — The type of the submitted document ("Original" or "Photocopy").
- Issuing_Authority: String — The authority that issued the document.

▪ For **Relinquishment Deed:**

- Relinquisher: String — The name of the Relinquisher.
- Recipient: String — The name of the Recipient.
- Date: String (Date in "DD/MM/YYYY" format) — The date of the document.
- Document_No: String — The document number.
- Original/Photo_Copy: String — The type of the submitted document ("Original" or "Photocopy").
- Issuing_Authority: String — The authority that issued the document.

▪ For **Will Deed:**

- Testator: String — The name of the testator.
- Beneficiary: String — The name of the beneficiary.
- Date: String (Date in "DD/MM/YYYY" format) — The date of the document.
- Document_No: String — The document number.
- Original/Photo_Copy: String — The type of the submitted document ("Original" or "Photocopy").
- Issuing_Authority: String — The authority that issued the document.

▪ For **Encumbrance Certificate:**

- EC_Issuing_Authority: String — The authority that issued the Encumbrance Certificate.
- EC_Statement_Number: String — The statement number on the certificate.
- From_Date: String (Date in "DD/MM/YYYY" format) — The start date for the certificate.
- To_Date: String (Date in "DD/MM/YYYY" format) — The end date for the certificate.
- Original/Photo_Copy: String — The type of the submitted document ("EC Obtained Online", "Original Obtained From SRO").
